solutions, 24 hours a day, 7 days a week.

“YOUR PROFESSIONAL PARTNER
IN CLEANING CHEMICALS”

CP METAL CHEMICALS

CP Metal Chemicals supplies high-quality marine chemicals used for the cleaning of chemical, product tankers and storage tanks. Our philosophy is to produce at our main factory and distribute all over the world to stock at the main ports to control quality worldwide. Our tank cleaning products are of the highest quality and have a high concentration of active components. This has the following advantages for our clients:

- Less product required per cleaning session
- Effective at lower temperatures
- More efficient cleaning process

With our products, cleaning procedures take less time and objects can be cleaned at lower temperatures. This results in significant savings, due to shorter port calls, reduced fuel consumption and a lesser environmental footprint. Our cleaning products are all MARPOL/IMO approved, in accordance with MEPC. 1/Circ. 590, and are included on the IMO List Annex10 MEPC.2.

CP METAL CHEMICALS

BEST BEFORE:

T1166 MARINE

T1166 is based on high purity phosphoric acid with a detergent and can be used as tank cleaning agent or metal brightener. Removes corrosion of all metals. Excellent cleaner to remove so-called white residues. T1166 Marine can be used as a spot cleaner after cleaning fats and fatty acids. Safe to use on painted surfaces. Odourless, so it can be used in enclosed space. Suitable for manual cleaning.

CP SUPER DEGREASER

CP Super Degreaser is an emulsifying tank cleaning agent based on aromatic solvents. Contains anionic and non-ionic surface agent. Specific solvent with high boiling and flash point. Ideally suitable for the removal of all Annex 1 and Annex 2. Can be used diluted 2-9 % up to 90°C (194°F). Safe for use on epoxy, polyurethane, zinc-silicate coatings and stainless steel.

NA MARINE

NA Marine is an excellent smell killer and cleaning product suitable to use by recirculation and high or low pressure systems. NA Marine is designed to neutralize the smells from acrylates. NA Marine is applicable on Ferro metals and stainless steel surfaces. NA Marine removes oils, fat (mineral, animal, natural) and fatty acids, even when they are hardened out, oxidized or burned. NA Marine removes light mineral contamination and is also used for the cleaning of mineral additives.

CP LEAD CLEAN

CP Lead Clean is a high performance solvent cleaner for removal of hydrocarbons and inhibitor residues. This product is highly concentrated, hydrocarbon free. Contains no acids, alkali and phosphates. No dangerous good in regulation of transport and storage. Safe to use on stainless steel and resistant coatings.
